## **DETAILED ACTION**

### ***Specification***

The specification has been checked to the extent necessary to determine the presence of all possible minor errors. However, the applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### ***Claim Rejections***

#### ***Claim Rejections - 35 USC § 112***

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Correction or clarification is required.

In claim 1, the recitation “the limit” on line 6 lacks antecedent basis. It is unclear what “any limit” on line 5 is, how it can be prescribed for the amplitude of the subject signal, and how the recitation “differential signal generating means” and “amplitude limiting means” is read on the preferred embodiment. Insofar as understood, no such means is seen on the drawings. The same is true for claims 6 and 7.

In claim 2, it is unclear what the “prescribed content” on line 3 is and the recitation “the filtered differential signal” on line 5 lacks clear antecedent basis. The same is true for reciting “the amplitude limitation” on line 7 of claim 3.

In claim 3, it is not understood how the means can be “carried out” on line 5 by digital processing and what the “digital processing”, “symbols” and “subcarrier components” are since they are clearly defined.

Art Unit: 2816

In claim 4, the recitation “amplitude limitation” on line 8 is confusing because it is unclear if this is an additional” limitation” or further recitation of the previously claimed “limitation” in claim 3. The same is true for reciting “one or more combinations of a plurality of bands” on line 21 of claims 6-7.

In claim 6, it is unclear what the “combinations of a plurality of bands” are, how the bands can be taken out, what the “other filtering means” on line 7 is and how it is read on the preferred embodiment or seen on the drawings. The same is true for claims 7-9.

In claim 10, the recitation “the power” on line 6 lacks antecedent basis and it is unclear what the power is and how the signals can have the power.

The remaining claims are dependent from the above claims and therefore also considered indefinite.

### ***Allowable Subject Matter***

Claims 1-10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The claims are allowable because the prior art does not show the combination of the differential signal generating means and the amplitude limiting means as recited in claim 1.
